- Check pump room exhaust (if applicable) and ensure it's in working condition.
- Check the Floating switch inside the water tank (where it's accessible (removable via union), if not accessible, to be done during the water tank cleaning, when the tank is empty).
- Check the floating ball valve inside the water tank.
- Check the overall condition and cleanness of the water tank and report (with photos)

2.5 Roof Drain cleaning

- Roof/balcony drain cleaning will be carried out once a year.
- Visually check the condition of roof/balcony drain cover/dome and remove the debris and any obstacle that potentially could block the flow of water, Use the brush to remove any light debris that might be stuck to the side.
- Cleaning of the drain line using the pressure washer, run water through each drain point to make sure it's draining easily and freely. Use the brush to remove any light debris that might be stuck to the side.
- Visually checking the roof/balcony rain water drain points in the ground level to ensure free flow of water.
- Visually checking the condition of roof waterproofing (if exposed) and report any abnormality.

2.6 Water tank cleaning

- Water tank cleaning service will be carried out twice a year.
- YALLA FIX IT ONE PERSON COMPANY LLC water tank cleaning technicians are trained and certified by DM approved third party institution.
- During the water tank cleaning potential water supply interruptions to be communicated with the client and both parties to agree on time/date (working days/hours 9:00 am to 6:00 pm only)
- Visually inspect internal walls of tank for signs of scale deposition, corrosion and report any abnormality.
- Visually inspect tank and associated valves/pipework for signs of corrosion and leaks.
- Visually inspect that the ball valve opens and closes correctly and report any abnormality.
- Visually inspect the floating valve and foot valve to ensure functioning properly and report any abnormality.
- Existing water to be drained via submersible pump to the nearest drainage and/or the main supply valve to be closed prior to the schedule to reduce the water level in the water tank.

- Cleaning the interior walls of the water tank with power wash using disinfectant chemical, approved for water tank cleaning by Dubai municipality, in order to remove the slime and dirt build up on the floor, sides and corners of the water tank.
- Refilling of the water after the cleaning process to be done by DEWA line.
- Test and commissioning of the water supply pressure and factuality of the water pumps after refilling the tank.
- Laboratory water test report is not included in this package, if required to be provided upon approval of the quotation.

2.7 Duct cleaning

- Air duct cleaning/sanitation to be carried out once a year.
- Covering and protection of floor, furniture using drop sheet and polyethylene sheet to protect the surrounding area from the dust.
- Check the functionality of the air-conditioning unit (thermoset setting and grill temperature and running noise level to be checked) and report any abnormality.
- Removal of the A/C diffuser/grill and clean/wash with water and cleaning agent and installation of the same after drying, including new white/clear silicon filler for the gap between the wall and diffuser/grill outer body.
- Cleaning of Air handling unit accessible air Duct Interior walls by using professional high-pressure vacuum machine with rotational brush head. (Rotobrush)
- Cleaning of the AC filter and Drain pan/pipe.
- Sanitizing the interior surface of the Airducts, using antibacterial chemical (eco-friendly, odorless) and ensure the antibacterial chemical effectively covering all accessible surfaces, using ULV fogging machine.
- If performing duct cleaning for one or multiple units required creation of temporary ceiling access and/or PI/GI duct access, due to the length of the duct, VCD or branches shape, proceeding with the inaccessible area is subject to approval of the quotation for creation of access (ceiling/duct) and related works. Alternatively, inaccessible ducts will be kept untouched.
- If the unit/ diffuser/grill height is not reachable safely by standard ladder for one or multiple units and scaffolding is required, additional charge for supply, delivery, assembly of scaffolding will be applicable. Alternatively, inaccessible grill/diffusers will be kept untouched.

2.8 Coil cleaning:

- Evaporator coil cleaning/sanitation to be carried out once a year.
- Check the functionality of the air-conditioning unit (thermoset setting and grill temperature and running noise level to be checked) and report any abnormality.
- Covering and protection of floor using drop sheet and polyethylene sheet to protect the surrounding area from the dust, dirt and water.
- Deep cleaning of the accessible evaporator coil, using pressure washer and Dubai municipality approved coil cleaning chemical to remove the dirt and scale build-up, to allow free circulation of air in the coil and maximize the efficiency of the air-conditioning by proper heat exchange in evaporator coil.
- Cleaning of the AC filter and Drain pan/pipe.
- Removal and cleaning of accessible fan motor and fan blower and reinstallation of the same after drying.
- Check the performance of the air-conditioning unit after the completion of the task and report any abnormality.
- If performing coil cleaning for one or multiple units required creation of temporary ceiling access, proceeding with the coil cleaning task for the inaccessible unit is subject to approval of the quotation for creation of the access and related works. Alternatively, inaccessible ducts will be kept untouched.

2.9 - Free Handyman service (If applicable)

Based on the selected AMC package, limited hours of handyman service to be delivered to the customer, upon request (to be scheduled at least 48 hours ahead of time).

Handyman is defined as team of two (one technician and one helper) with all necessary standard tools and basic consumables (supply materials and spare parts is not part of the handyman service)

Below will be considered as handyman service:

- Repair of the fly screen, aluminum/wooden door adjustment/alignments.
- Repair and adjustment of hinges, drawer rails, cabinet/cupboard catches, lock cylinder.
- Assembly/installation of the furniture (where two persons are enough for assembly)
- Hanging of photo frames and art works (on standard height) installation of shelves.
- Minor paint touch ups and wall/ceiling rectification/painting (accessible height with standard ladder), painting material to be provided by customer.

- Installation of standard size chandelier, wall light and minor electrical and plumbing works (where new electricity/water supply line or control/valve is not needed)
- Mirror masonry works such as grouting, and fixing of single isolated tile and Sealant (silicon) work.
- Housekeeping, arrangement of the storage. (where two persons are enough for moving the items)

3- Emergency, Non-emergency call out:

3.1 Emergency call-out

- All calls, out of standard working hours (9:00 am to 6:00 pm), Fridays and holidays will be considered as Emergency call
- Emergency Call-outs are limited to below listed:
 - Complete failure of air conditioning system.
 - Complete failure of electrical power, power outage or any failure that could be considered as fire hazard.
 - Complete failure of water system. (Major plumbing failures, i.e. heavy leaks)
 - Complete failure of drainage system. (major blockage and overflowing)
- Emergency calls to be logged within 60 minutes from the initial call/message (WhatsApp/SMS) and to be attended free of charge within 120 minutes from the recorded logging, considering traffic conditions and/or potential community access restrictions and availability.
- An emergency teams will be assigned to “manage the disaster condition” and “control the source” that potentially could cause damage to the property and/or makes the property unserviceable for the customer, however to proceed with the rectification work, when parts, specific tools/profession and/or extensive time is required, to be scheduled for the next available slot (during the working hours, with priority). And might be subject to quotation based on required materials and necessary manpower. Customer’s written approval is mandatory prior to scheduling.
- Misuse of emergency call out will be charged the client.

3.2 Non-Emergency call-out

- Non-Emergency call outs are the inquiries that are not covered under the Planned preventive maintenance, Emergency call-out and handyman definition.
- If physical visit is required, schedule of non-emergency visit to be agreed as per available slots and customer request, within 48 hours from the logging the inquiry.
- Non-Emergency visits are designed for inspection and identification of the root cause of the reported issue and/or minor adjustments, rectifications that not required any material replacement and can be done maximum within 2 hours. (number of free non-emergency visits per year to be defined as per the selected AMC package terms and conditions)
- Where replacement of parts and/or extensive time (more than 2 hours) is required, the quotation, based on estimated material + handling fee and required manpower/hours, along with the job sheet to be shared with the customer for review and approval, within 24 hours from the site visit. Customer’s written approval is mandatory prior to scheduling.

4- Materials, spare parts, consumables and Labor

All Consumable are covered in this contract:

- Consumables are general minor items such as PVC solvent, electric insulation tape, electric connector, polyethylene sheet for covering the work area, garbage bag, PPE (personal protective equipment), mask and shoes cover, Basic cleaning chemicals that is going be used in A/C cleaning service, water tank cleaning, A/C duct cleaning and coil cleaning.

All Materials and spare parts are not covered in this contract:

- Spare parts are classified as minor parts, required for repair and fix of the maintenance issues, covered, such as UPVC connections (Elbow, socket, T joint), CP connections (Elbow, socket, T joint, extension, reducer), electric 3 pin plug, light bulbs, capacitor, standard GI screw, nut and washer, standard flexible hose, etc. spare parts to be quoted as lumpsum along with the estimated manpower for the specific scope of work.
- Materials are classified as major parts, such as A/C fan moto/blower, A/C compressor, kitchen faucet, hand spray, etc. Only appropriate materials of equal or better quality than those originally installed will be used to rectify the problem for any damaged parts that has been reported from the inspection and will be charged to client. Any materials replacement will be invoiced separately with 20% handling fee upon approval of the Client. Additional works and services will be charged to the Client in the form of quotation, Customer’s written approval is mandatory prior to scheduling.

YALLA FIX IT ONE PERSON COMPANY LLC will outsource the materials. hence, not liable if materials are not available in UAE market. An equivalent part can be suggested with approval of the Client before purchase/installation. YALLA FIX IT ONE PERSON COMPANY LLC will not offer any warranty on any materials or parts apart from manufacturer warranty.
